SYNOPSIS

The key to the story of Rolling Stars is "comedy" and "protecting the Earth." The aim is to abide by the common standard that leads to popularity. Rather than dealing with the complicated rules of a baseball game, it consists of interesting and fun episodes (slapsticks) that are created by the characters. Rolling Stars abides by "Save the Earth" code that has continuously been a success for many generations. The only difference is that balls, gloves and baseball bats will be used instead of laser guns or swords.
